ELSEVIER

Thin Solid Films 374 (2000) 328–333

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volume 374

a-Si:H thin films
  a-Si:H film deposition using same phase modulated scanning plasma method, 274
Ab initio electronic structure calculation
  Theoretical study of penetration reaction of fluorine atoms and ions into hydrogen-terminated Si(111) thin film, 143
Adhesion
  Thermal imidization of poly(amic acid) precursors on glycidyl methacry-late (GMA) graft-polymerized Si(100) surface, 70
Alumina substrates
  Influence of surface structure on the growth of Au on αAl_2O_3 ($\bar{1}012$), 134
Aluminium
  Preparation and characterisation of solar selective SnOx:F coated aluminium reflector surfaces, 1
Ambient gas
  Deposition of fine carbon particles using pulsed ArF laser ablation assisted by inductively coupled plasma, 287
Amorphous materials
  Plasma-enhanced chemical vapor deposition of silicon carbonitride using hexamethyldisilazane and nitrogen, 92
Atomistic simulations
  Calculations of the atomic structure of the $KNbO_3$ (110) surface, 64
Azobenzene derivatives
  Two angular patterns of second harmonic generation in Langmuir–Blodgett films, 119

Barrier discharge
  Excited atoms in the vicinity of a surface in a barrier discharge measured by evanescent-wave laser spectroscopy, 157
Bias-enhanced nucleation
  Effect of bias-enhancement in diamond nucleation and growth on nickel, 268

C_2F_6 plasmas
  SiO_2 etching in inductively coupled C_2F_6 plasmas: surface chemistry and two-dimensional simulations, 311
C_3F_6
  Radical kinetics for polymer film deposition in fluorocarbon (C_4F_8, C_3F_6 and C_5F_8) plasmas, 303
C_4F_8
  Radical kinetics for polymer film deposition in fluorocarbon (C_4F_8, C_3F_6 and C_5F_8) plasmas, 303
C_5F_8
  Plasma enhanced chemical vapor deposition of thermally stable and low-dielectric-constant fluorinated amorphous carbon films using low-global-warming-potential gas C_5F_8, 256
  Radical kinetics for polymer film deposition in fluorocarbon (C_4F_8, C_3F_6 and C_5F_8) plasmas, 303

Carbonitride
  Plasma-enhanced chemical vapor deposition of silicon carbonitride using hexamethyldisilazane and nitrogen, 92
CF_2
  Correlation between CF_2 and CxFy densities in C_4F_8 plasmas, 249
Charge exchange collision
  Ion energy distribution at an r.f.-biased electrode in an inductively coupled plasma affected by collisions in a sheath, 167
Charging
  Transport mechanisms of ions and neutrals in low-pressure, high-density plasma etching of high aspect ratio contact holes, 190
Chemical vapor deposition
  Plasma enhanced chemical vapor deposition of thermally stable and low-dielectric-constant fluorinated amorphous carbon films using low-global-warming-potential gas C_5F_8, 256
CMOS devices
  Plasma processed ultra-thin SiO_2 interfaces for advanced silicon NMOS and PMOS devices: applications to Si-oxide/Si oxynitride, Si-oxide/Si nitride and Si-oxide /transition metal oxide stacked gate dielectrics, 217
Coatings
  Detection of deposition rate of plasma-polymerized films by quartz crystal microbalance, 262
Cobalt
  X-ray study of Co/Ni and Co/Pt/Ni/Pt multilayers, 10
  Detection of cobalt silicide phase formations by ultrafast optical measurements, 42
Contact hole
  Proton channeling into the Si substrate at the bottom of ultrahigh-aspect-ratio contact holes during plasma etching, 228
Cross-sections
  Absolute total and partial cross-sections for the electron impact ionization of TiCl4, 291
Crystallisation
  Morphology of crystalline α-MoO_3 thin films spin-coated on Si (100), 49
CVD diamond
  Effect of bias-enhancement in diamond nucleation and growth on nickel, 268
CxFy
  Correlation between CF_2 and CxFy densities in C_4F_8 plasmas, 249
Cyclic voltammetry
  In situ cyclic voltammetry-surface-enhanced Raman spectroscopy: studies on the doping–undoping of polypyrrole film, 85

PII: S0040-6090(00)01456-5

Deposition process
The influence of Mg doping on the materials properties of Ba1 − xSrxTiO3 thin films for tunable device applications, 34
Diamond
Influence of nitrogen incorporation on the electrical properties of MPCVD diamond films growth in CH_4–CO_2–N_2 and CH_4–H_2–N_2 gas mixtures, 27
Diamond like carbon (DLC)
Deposition of fine carbon particles using pulsed ArF laser ablation assisted by inductively coupled plasma, 287
Dilectric properties
The influence of Mg doping on the materials properties of Ba1 − xSrxTiO3 thin films for tunable device applications, 34
Doping–undoping
In situ cyclic voltammetry-surface-enhanced Raman spectroscopy: studies on the doping–undoping of polypyrrole film, 85
Droplet
Effects of cross-magnetic field on thin film preparation by pulsed Nd/YAG laser deposition, 278
Dry etching
Investigation of ion transportation in high-aspect-ratio holes from fluorocarbon plasma for SiO_2 etching, 181

Electrical properties and measurements
Influence of nitrogen incorporation on the electrical properties of MPCVD diamond films growth in CH_4–CO_2–N_2 and CH_4–H_2–N_2 gas mixtures, 27
Electrochemistry
Monolayers of a series of viologen derivatives and the electrochemical properties in Langmuir–Blodgett films, 125
Electron attachment mass spectrometry
Difference between C_4F_8 and C_5F_8 plasmas in surface reaction processes for selective etching of SiO_2 over Si_3N_4, 243
Electron diffraction
The effects of growth temperature on the microstructure and electrical barrier height in PtSi/p-Si(100) Schottky barrier detector, 80
Electron impact ionization
Absolute total and partial cross-sections for the electron impact ionization of TiCl4, 291
Electronic structures
Magnetic and electronic properties of strained fcc Fe on Ir(001), 114
Ellipsometry
Effect of bias-enhancement in diamond nucleation and growth on nickel, 268
Epitaxy
Epitaxial growth of NiO/Pd superlattices by reactive evaporation method, 21
Magnetic and electronic properties of strained fcc Fe on Ir(001), 114
Etch anisotropy
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Etching
Theoretical study of penetration reaction of fluorine atoms and ions into hydrogen-terminated Si(111) thin film, 143
Atomistic simulation of silicon bombardment by energetic CF_3^+: product distributions and energies, 150
Transport mechanisms of ions and neutrals in low-pressure, high-density plasma etching of high aspect ratio contact holes, 190
Etching rate
Difference between C_4F_8 and C_5F_8 plasmas in surface reaction processes for selective etching of SiO_2 over Si_3N_4, 243
Evanscent wave
Excited atoms in the vicinity of a surface in a barrier discharge measured by evanescent-wave laser spectroscopy, 157
Evaporation
Growth and characterization of polyaniline 7,7,8,8 -tetracyanoquino-dimethane (TCNQ) complex films grown by vacuum evaporation, 59
Feature profile evolution
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208

Film miscrostructure
The influence of Mg doping on the materials properties of Ba1 − xSrxTiO3 thin films for tunable device applications, 34
Fluorinated amorphous carbon
Low dielectric fluorinated amorphous carbon thin films grown from C_6F_6 and Ar plasma, 103
Fluorine penetration
Theoretical study of penetration reaction of fluorine atoms and ions into hydrogen-terminated Si(111) thin film, 143
Fluorocarbon
Atomistic simulation of silicon bombardment by energetic CF_3^+: product distributions and energies, 150
Fluorocarbon film
Radical kinetics for polymer film deposition in fluorocarbon (C_4F_8, C_3F_6 and C_5F_8) plasmas, 303
Fluorocarbon plasma
Effects of low-molecular-weight radicals for reduction of microloading in high-aspect contact-hole etching, 235
Fluorocarbon plasmas
Correlation between CF_2 and CxFy densities in C_4F_8 plasmas, 249
FT-IR ellipsometry
Difference between C_4F_8 and C_5F_8 plasmas in surface reaction processes for selective etching of SiO_2 over Si_3N_4, 243
FTIR
Thermal imidization of poly(amic acid) precursors on glycidyl methacrylate (GMA) graft-polymerized Si(100) surface, 70
Global warming potential
Plasma enhanced chemical vapor deposition of thermally stable and low-dielectric-constant fluorinated amorphous carbon films using low-global-warming-potential gas C_5F_8, 256
Graft polymerization
Thermal imidization of poly(amic acid) precursors on glycidyl methacrylate (GMA) graft-polymerized Si(100) surface, 70
Growth kinetics
Influence of surface structure on the growth of Au on αAl_2O_3 ($\bar{1}012$), 134

Hall effect
Preparation and characterisation of solar selective SnOx:F coated aluminium reflector surfaces, 1
Hexagonal diamond
Effect of bias-enhancement in diamond nucleation and growth on nickel, 268
Hydrogen-terminated Si(111) thin film
Theoretical study of penetration reaction of fluorine atoms and ions into hydrogen-terminated Si(111) thin film, 143

Imidization
Thermal imidization of poly(amic acid) precursors on glycidyl methacrylate (GMA) graft-polymerized Si(100) surface, 70
Inductively coupled plasma (ICP)
Deposition of fine carbon particles using pulsed ArF laser ablation assisted by inductively coupled plasma, 287
Inter-metal dielectric
Plasma enhanced chemical vapor deposition of thermally stable and low-dielectric-constant fluorinated amorphous carbon films using qlow-global-warming-potential gas C_5F_8, 256
Ion channeling
Proton channeling into the Si substrate at the bottom of ultrahigh-aspect-ratio contact holes during plasma etching, 228
Ion energy
Investigation of ion transportation in high-aspect-ratio holes from fluorocarbon plasma for SiO_2 etching, 181
Ion energy analyzer
Ion energy distribution at an r.f.-biased electrode in an inductively coupled plasma affected by collisions in a sheath, 167
Ion energy distribution
Ion energy distribution at an r.f.-biased electrode in an inductively coupled plasma affected by collisions in a sheath, 167
Ion flux
Investigation of ion transportation in high-aspect-ratio holes from fluorocarbon plasma for SiO_2 etching, 181
Iron
Magnetic and electronic properties of strained fcc Fe on Ir(001), 114

Kinetic energy distributions
Atomistic simulation of silicon bombardment by energetic CF_3^+: product distributions and energies, 150
$KNbO_3$
Calculations of the atomic structure of the $KNbO_3$ (110) surface, 64
Knudsen transport
Transport mechanisms of ions and neutrals in low-pressure, high-density plasma etching of high aspect ratio contact holes, 190

Langmuir–Blodgett films
Two angular patterns of second harmonic generation in Langmuir–Blodgett films, 119
Monolayers of a series of viologen derivatives and the electrochemical properties in Langmuir–Blodgett films, 125
Large-area
Effects of cross-magnetic field on thin film preparation by pulsed Nd/YAG laser deposition, 278
Laser ablation
Deposition of fine carbon particles using pulsed ArF laser ablation assisted by inductively coupled plasma, 287
Low dielectric constant
Low dielectric fluorinated amorphous carbon thin films grown from C_6F_6 and Ar plasma, 103
Plasma enhanced chemical vapor deposition of thermally stable and low-dielectric-constant fluorinated amorphous carbon films using low-global-warming-potential gas C_5F_8, 256
Low GWP alternative gas
Radical kinetics for polymer film deposition in fluorocarbon (C_4F_8, C_3F_6 and C_5F_8) plasmas, 303
Low-K material
Low dielectric fluorinated amorphous carbon thin films grown from C_6F_6 and Ar plasma, 103
Low-pressure high-density plasmas
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Low-pressure, high-density plasmas
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Luminescence
Influence of nitrogen incorporation on the electrical properties of MPCVD diamond films growth in CH_4–CO_2–N_2 and CH_4–H_2–N_2 gas mixtures, 27

Magnetic field
Effects of cross-magnetic field on thin film preparation by pulsed Nd/YAG laser deposition, 278
Magnetic properties
Reversible photoinduced switching of magnetic properties at room temperature of iron oxide particles in self-assembled films containing azobenzene, 109
Magnetic and electronic properties of strained fcc Fe on Ir(001), 114
Mechanical property
Plasma-enhanced chemical vapor deposition of silicon carbonitride using hexamethyldisilazane and nitrogen, 92
Mechanisms
Atomistic simulation of silicon bombardment by energetic CF_3^+: product distributions and energies, 150
Mesoscopic inorganic structures
Reversible photoinduced switching of magnetic properties at room temperature of iron oxide particles in self-assembled films containing azobenzene, 109
Metastable atoms
Excited atoms in the vicinity of a surface in a barrier discharge measured by evanescent-wave laser spectroscopy, 157
Micro capillary plate
Investigation of ion transportation in high-aspect-ratio holes from fluorocarbon plasma for SiO_2 etching, 181
Microscopic uniformity
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Microtrenching
Plasma interactions with high aspect ratio patterned surfaces: ion transport, scattering, and the role of charging, 175
Model catalyst
Morphology of crystalline α-MoO_3 thin films spin-coated on Si (100), 49
Modulated magnetic field
a-Si:H film deposition using same phase modulated scanning plasma method, 274
Molecular dynamics
Atomistic simulation of silicon bombardment by energetic CF_3^+: product distributions and energies, 150
Molybdenum oxide
Morphology of crystalline α-MoO_3 thin films spin-coated on Si (100), 49
Monolayers
Monolayers of a series of viologen derivatives and the electrochemical properties in Langmuir–Blodgett films, 125
Multilayer
Two angular patterns of second harmonic generation in Langmuir–Blodgett films, 119
Multilayers
X-ray study of Co/Ni and Co/Pt/Ni/Pt multilayers, 10

Nano-films
Reversible photoinduced switching of magnetic properties at room temperature of iron oxide particles in self-assembled films containing azobenzene, 109
Nickel
X-ray study of Co/Ni and Co/Pt/Ni/Pt multilayers, 10
Nickel catalyst
Effect of bias-enhancement in diamond nucleation and growth on nickel, 268
NiO
Epitaxial growth of NiO/Pd superlattices by reactive evaporation method, 21
Nitridation and deposition
Plasma processed ultra-thin SiO_2 interfaces for advanced silicon NMOS and PMOS devices: applications to Si-oxide/Si oxynitride, Si-oxide/Si nitride and Si-oxide /transition metal oxide stacked gate dielectrics, 217
Nitrogen
Influence of nitrogen incorporation on the electrical properties of MPCVD diamond films growth in CH_4–CO_2–N_2 and CH_4–H_2–N_2 gas mixtures, 27

Optical control
Reversible photoinduced switching of magnetic properties at room temperature of iron oxide particles in self-assembled films containing azobenzene, 109
Optical properties
Detection of cobalt silicide phase formations by ultrafast optical measurements, 42
Organic conductors
Growth and characterization of polyaniline 7,7,8,8 -tetracyanoquino-dimethane (TCNQ) complex films grown by vacuum evaporation, 59
Organized organic assemblies
Reversible photoinduced switching of magnetic properties at room temperature of iron oxide particles in self-assembled films containing azobenzene, 109
Oxygen gas kinetics of adsorption and desorption
The quenching of porous silicon photoluminescence by gaseous oxygen, 98

Particle growth
Deposition of fine carbon particles using pulsed ArF laser ablation assisted by inductively coupled plasma, 287
Pd
Epitaxial growth of NiO/Pd superlattices by reactive evaporation method, 21
Perovskites
Calculations of the atomic structure of the $KNbO_3$ (110) surface, 64
Plasma
Scanning tunneling microscopy of plasma–solid surface interface, 162
Plasma enhanced chemical vapor deposition of thermally stable and low-dielectric-constant fluorinated amorphous carbon films using low-global-warming-potential gas C_5F_8, 256
Plasma deposition
Absolute total and partial cross-sections for the electron impact ionization of TiCl4, 291
Plasma diagnostics
Excited atoms in the vicinity of a surface in a barrier discharge measured by evanescent-wave laser spectroscopy, 157
Plasma etching
Scanning tunneling microscopy of plasma–solid surface interface, 162
Ion energy distribution at an r.f.-biased electrode in an inductively coupled plasma affected by collisions in a sheath, 167
Plasma interactions with high aspect ratio patterned surfaces: ion transport, scattering, and the role of charging, 175
Proton channeling into the Si substrate at the bottom of ultrahigh-aspect-ratio contact holes during plasma etching, 228
Plasma polymerization
Radical kinetics for polymer film deposition in fluorocarbon (C_4F_8, C_3F_6 and C_5F_8) plasmas, 303
Plasma processing and deposition
Plasma-enhanced chemical vapor deposition of silicon carbonitride using hexamethyldisilazane and nitrogen, 92
Low dielectric fluorinated amorphous carbon thin films grown from C_6F_6 and Ar plasma, 103
Transport mechanisms of ions and neutrals in low-pressure, high-density plasma etching of high aspect ratio contact holes, 190
Detection of deposition rate of plasma-polymerized films by quartz crystal microbalance, 262
Plasma–solid interface
Scanning tunneling microscopy of plasma–solid surface interface, 162
Plasma–surface interaction
Correlation between CF_2 and $CxFy$ densities in C_4F_8 plasmas, 249
Plasma-assisted oxidation
Plasma processed ultra-thin SiO_2 interfaces for advanced silicon NMOS and PMOS devices: applications to Si-oxide/Si oxynitride, Si-oxide/Si nitride and Si-oxide /transition metal oxide stacked gate dielectrics, 217
Plasma-carburising
In situ spectroscopic ellipsometry for plasma-carburising process, 298
Polyimides
Thermal imidization of poly(amic acid) precursors on glycidyl methacrylate (GMA) graft-polymerized Si(100) surface, 70
Polymer
Growth and characterization of polyaniline 7,7,8,8 -tetracyanoquino-dimethane (TCNQ) complex films grown by vacuum evaporation, 59
Polymer deposition
Difference between C_4F_8 and C_5F_8 plasmas in surface reaction processes for selective etching of SiO_2 over Si_3N_4, 243
Polymerization
SiO_2 etching in inductively coupled C_2F_6 plasmas: surface chemistry and two-dimensional simulations, 311
Polymerized species
Difference between C_4F_8 and C_5F_8 plasmas in surface reaction processes for selective etching of SiO_2 over Si_3N_4, 243
Polymers
Detection of deposition rate of plasma-polymerized films by quartz crystal microbalance, 262
Polypyrrole
In situ cyclic voltammetry-surface-enhanced Raman spectroscopy: studies on the doping–undoping of polypyrrole film, 85
Porous silicon photoluminescence
The quenching of porous silicon photoluminescence by gaseous oxygen, 98
Precursor for deposition
Correlation between CF_2 and $CxFy$ densities in C_4F_8 plasmas, 249
PtSi
The effects of growth temperature and microstructure and

electrical barrier height in PtSi/p-Si(100) Schottky barrier detector, 80
Pulsed laser deposition
Effects of cross-magnetic field on thin film preparation by pulsed Nd/YAG laser deposition, 278
Formation and properties of TiC thin films by pulsed Nd/YAG laser deposition, 282
Pulsed plasma etching
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Pyrolysis
Preparation and characterisation of solar selective SnO*x*:F coated aluminium reflector surfaces, 1

Quadrupole mass spectrometer
Ion energy distribution at an r.f.-biased electrode in an inductively coupled plasma affected by collisions in a sheath, 167
Quartz crystal microbalance
Detection of deposition rate of plasma-polymerized films by quartz crystal microbalance, 262
Quenching
The quenching of porous silicon photoluminescence by gaseous oxygen, 98

Radical measurement
Radical kinetics for polymer film deposition in fluorocarbon (C_4F_8, C_3F_6 and C_5F_8) plasmas, 303
Reflection spec.
Detection of cobalt silicide phase formations by ultrafast optical measurements, 42
RIE lag
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
RIE-lag effect
Transport mechanisms of ions and neutrals in low-pressure, high-density plasma qetching of high aspect ratio contact holes, 190

Scanning plasma
a-Si:H film deposition using same phase modulated scanning plasma method, 274
Schottky barrier
The effects of growth temperature on the microstructure and electrical barrier height in PtSi/p-Si(100) Schottky barrier detector, 80
Selective radical generation
Effects of low-molecular-weight radicals for reduction of microloading in high-aspect contact-hole etching, 235
Selectivity
Difference between C_4F_8 and C_5F_8 plasmas in surface reaction processes for selective etching of SiO_2 over Si_3N_4, 243
Semiconductor
Plasma interactions with high aspect ratio patterned surfaces: ion transport, scattering, and the role of charging, 175
Semiconductor dielectric interfaces
Plasma processed ultra-thin SiO_2 interfaces for advanced silicon NMOS and PMOS devices: applications to Si-oxide/Si oxynitride, Si-oxide/Si nitride and Si-oxide /transition metal oxide stacked gate dielectrics, 217
Sheath
Ion energy distribution at an r.f.-biased electrode in an inductively coupled plasma affected by collisions in a sheath, 167
Si(100)
Thermal imidization of poly(amic acid) precursors on glycidyl methacrylate (GMA) graft-polymerized Si(100) surface, 70
Sidewall bowing
Plasma interactions with high aspect ratio patterned surfaces: ion transport, scattering, and the role of charging, 175
Silicides
Detection of cobalt silicide phase formations by ultrafast optical measurements, 42
Silicon
Atomistic simulation of silicon bombardment by energetic CF_3^+: product distributions and energies, 150
Silicon oxynitride alloys
Plasma processed ultra-thin SiO_2 interfaces for advanced silicon NMOS and PMOS devices: applications to Si-oxide/Si oxynitride, Si-oxide/Si nitride and Si-oxide /transition metal oxide stacked gate dielectrics, 217
SIMS
Proton channeling into the Si substrate at the bottom of ultrahigh-aspect-ratio contact holes during plasma etching, 228
Simulation
Investigation of ion transportation in high-aspect-ratio holes from fluorocarbon plasma for SiO_2 etching, 181
SiO_2
Investigation of ion transportation in high-aspect-ratio holes from fluorocarbon plasma for SiO_2 etching, 181
SiO_2 etching in inductively coupled C_2F_6 plasmas: surface chemistry and two-dimensional simulations, 311
SiO_2 etching
Effects of low-molecular-weight radicals for reduction of microloading in high-aspect contact-hole etching, 235
Spectroscopic ellipsometry
In situ spectroscopic ellipsometry for plasma-carburising process, 298
Spectroscopy
Excited atoms in the vicinity of a surface in a barrier discharge measured by evanescent-wave laser spectroscopy, 157
Spin-coating
Morphology of crystalline α-MoO_3 thin films spin-coated on Si (100), 49
Stacked gate dielectrics
Plasma processed ultra-thin SiO_2 interfaces for advanced silicon NMOS and PMOS devices: applications to Si-oxide/Si oxynitride, Si-oxide/Si nitride and Si-oxide /transition metal oxide stacked gate dielectrics, 217
Steel
In situ spectroscopic ellipsometry for plasma-carburising process, 298
STM
Scanning tunneling microscopy of plasma–solid surface interface, 162
Substrate temperature
Formation and properties of TiC thin films by pulsed Nd/YAG laser deposition, 282
Superlattices
Epitaxial growth of NiO/Pd superlattices by reactive evaporation method, 21
Surface
Excited atoms in the vicinity of a surface in a barrier discharge measured by evanescent-wave laser spectroscopy, 157

Surface and interface states
Calculations of the atomic structure of the $KNbO_3$ (110) surface, 64
Magnetic and electronic properties of strained fcc Fe on Ir(001), 114
Surface morphology
Growth and characterization of polyaniline 7,7,8,8 -tetracyanoquino-dimethane (TCNQ) complex films grown by vacuum evaporation, 59
Surface structure
Influence of surface structure on the growth of Au on αAl_2O_3 ($\bar{1}012$), 134
Surface-enhanced Raman spectroscopy
In situ cyclic voltammetry-surface-enhanced Raman spectroscopy: studies on the doping–undoping of polypyrrole film, 85

TEM
Proton channeling into the Si substrate at the bottom of ultrahigh-aspect-ratio contact holes during plasma etching, 228
Thin films
Effects of cross-magnetic field on thin film preparation by pulsed Nd/YAG laser deposition, 278
Formation and properties of TiC thin films by pulsed Nd/YAG laser deposition, 282
Time-dependent surface chemistry
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Dynamics of plasma–surface interactions and feature profile evolution during pulsed plasma etching, 208
Tin oxide
Preparation and characterisation of solar selective SnO*x*:F coated aluminium reflector surfaces, 1
Titanium carbide
Formation and properties of TiC thin films by pulsed Nd/YAG laser deposition, 282
Titanium tetrachloride
Absolute total and partial cross-sections for the electron impact ionization of TiCl4, 291
Transition metal oxides
Plasma processed ultra-thin SiO_2 interfaces for advanced silicon NMOS and PMOS devices: applications to Si-oxide/Si oxynitride, Si-oxide/Si nitride and Si-oxide /transition metal oxide stacked gate dielectrics, 217
Transmisson electron microscopy
The effects of growth temperature on the microstructure and electrical barrier height in PtSi/p-Si(100) Schottky barrier detector, 80
Transport mechanism
Transport mechanisms of ions and neutrals in low-pressure, high -density plasma etching of high aspect ratio contact holes, 190
Ultra-high-aspect
Proton channeling into the Si substrate at the bottom of ultrahigh-aspect-ratio contact holes during plasma etching, 228
Uniform
Effects of cross-magnetic field on thin film preparation by pulsed Nd/YAG laser deposition, 278
X-Ray scattering
X-ray study of Co/Ni and Co/Pt/Ni/Pt multilayers, 10
XPS
Thermal imidization of poly(amic acid) precursors on glycidyl methacrylate (GMA) graft-polymerized Si(100) surface, 70
